

- Identify the distinct and unique values in the make column of the vehicles dataset and count the occurrences of each.
- Filter and display only the vehicles with a city mileage greater than 30.
- Display vehicles where either the city mileage is greater than 30 or both of the following conditions are met: the number of cylinders is less than 6 and the fuel type is Regular.
- Sort the vehicles dataset in descending order by highway mileage.
- Sort the model column of the common dataset based on the years column in descending order.
- Merge the years column from the common dataset into the vehicles dataset. If no match is found, fill with "Not reported."
